Experience

Innovation Hub Digital Marketing Services | Optinet Solutions

Cebu City

Senior AI Specialist | AI Automation Engineer

April 2026 - Present

- Managed a portfolio of AI, web, mobile, and enterprise software projects end-to-end as Project Lead for a Europe-based client, driving architecture, development, and client delivery.
- Designed and built AI-powered tools and automation systems for client projects, taking work from initial discovery through production deployment.
- Worked directly with the client to gather requirements, run discovery sessions, demo iterations, and translate business needs into technical specifications.
- Designed conversational logic and evaluation flows using OpenAI and Anthropic Claude APIs, applying structured prompt engineering for consistent, production-grade outputs.
- Built and deployed the full stack on Vercel and Supabase, with version control and CI managed through GitHub.
- Maintained clean, modular code and shipped iterative releases based on real-world client feedback.
- Gained hands-on experience leading client-facing AI projects from concept to launch in a fast-paced, founder-led environment.

Monstarlab Philippines Inc.

Pasig City

Junior Full-Stack Software Developer (REMOTE/WFH)

Oct 2025 – March 2026

Project: MARINA BEST™ — Blockchain-Enabled Automated Certification System

- Assist in developing, maintaining, and debugging software applications. Write clean code, follow standards, design new features with the team, and participate in code reviews. Test software for quality and submit regular status reports.
- Contributed to the development of MARINA BEST™ (Blockchain-Enabled Automated Certification System), a blockchain-based platform for automating the issuance and verification of maritime certifications.
- Worked on both frontend and backend components, ensuring secure, transparent, and tamper-proof digital certificate workflows aligned with MARINA regulatory requirements.
- **Tech Stack:** Java, Spring Boot, Node.js, Yarn, MySQL, Elasticsearch, Hyperledger Fabric, NGINX, PM2, Linux (Ubuntu), WinSCP, Git

Alliance Software Inc.

Cebu City

Software Developer

May 2024 - Oct 2024

- Designed, developed, tested, and deployed software solutions for **XPAY** and **WebPOS** projects using PHP, Flash Builder, SQL, CSS, and HTML, ensuring adherence to quality standards.
- Implemented technical tasks assigned by the Project Leader, ensuring timely and accurate completion of project deliverables.
- Conducted unit and product testing to ensure the quality and functionality of developed software.
- Created and maintained technical documentation to support project requirements and future enhancements.
- Collaborated with cross-functional teams to troubleshoot, optimize, and improve application performance.

Pixel8 Web Solutions & Consultancy Inc

Legazpi City

Backend Developer – Intern (REMOTE/WFH)

June 2023 - July 2023

- Participate in analyzing, designing, development and/or implementation of the company's wide array of software projects.
- Created APIs, wrote PHPUnit tests, and ensured software reliability and efficiency.
- Solve routine technical service and equipment problems. Documenting projects, results and evaluations.

VocTech Senior High School | 4-month Program
Senior High School Immersion

Cebu City
May 2019 – Aug 2019

- Assisted the registrar's office with organizing student records, verifying enrollment requirements, and helping incoming students during the enrollment process.
- Participated in TESDA-led CCTV training and helped develop an RFID-based student logging system using PHP and XAMPP, which the school continues to use today.

Education

Cebu Institute of Technology - University
Bachelor of Science in Computer Science

Cebu City
Aug 2020 - June 2024

Thesis: Unit Test Efficiency Identifier (UTEI) using Visual Studio Code and OpenAI API

Description: Developed an AI-powered tool integrated with Visual Studio Code that analyzes unit test quality and efficiency using the OpenAI API. The system evaluates test cases, identifies potential weaknesses, and provides recommendations to improve test coverage, code reliability, and software quality.

VocTech Senior High School
TVL - Programming

Cebu City
2018 - 2020

Skills & Interests

Languages: C#, C++, C, Java, JavaScript, TypeScript, PHP, HTML5, CSS, SQL

Frameworks & Libraries: ASP.NET Core, ASP.NET MVC, .NET 6 Web API, Dapper ORM, Spring Boot, Node.js, Express.js, REST APIs

Database: MySQL, Elasticsearch, Supabase, Airtable, XAMPP

Blockchain: Hyperledger Fabric, Smart Contracts (Chaincode), Distributed Ledger Development

DevOps & Tools: Git, GitHub, GitLab, NGINX, PM2, Linux (Ubuntu), systemd, Vercel, Postman, API Integration, CI/CD, n8n, Twilio

Design: Figma, Canva, Adobe Photoshop, Adobe Illustrator, Responsive UI Design

Collaboration & Productivity: Slack, Microsoft 365, Technical Documentation, QA Testing, Agile Workflow, Client Support

Spoken Language: English (intermediate), Tagalog (native), Cebuano (native)

Interests: Artificial Intelligence, AI Automation, Conversational Systems, Story-Driven Media, Interactive Design, Creative Technology, System Architecture, Reflective Outdoor Activities
